

Aunt Ruby's German Green
Slightly flattened, 1 pound tomato that ripens to a pale greenish-yellow ("lime jello green") with a slight pink blush that extends to the inside. Superb, fruity sweet and slightly spicy taste. Irregular shaped, beefsteak variety. Source: TomatoFest
<i>80 days from transplanting</i>
Black TomatoFest
Beautiful dark mahogany-brown Black Russian heirloom tomato. Large bushy plants that yield abundant crops of large purple/black 1-lb tomatoes with green shoulders. One of the best tasting black tomatoes with a complex, balanced sweet flavor. Source: TomatoFest
<i>80 days from transplanting</i>
Black Cherry
Large, sprawling, indeterminate, regular-leaf, vigorous tomato plants that yield abundant crops in huge clusters of 1", round, deep purple, mahogany-brown cherry tomatoes. Fruits have sweet, rich, complex, full tomato flavors. Beautiful to mix with other colored cherry tomatoes. Disease resistant. Source: TomatoFest
<i>64 days from transplanting</i>
Black Krim
This rare and outstanding tomato yields 3-4" slightly flattened dark-red (mahogany-colored) slightly maroon, beefsteak tomatoes with deep green shoulders. Green gel around seeds. Fantastic, intense, slightly salty taste. Perfect choice for slicing, salads, and cooking. Also suitable for container/patio garden. Indeterminate, regular leaf plants with good yield. Midseason
<i>75 days from transplanting</i>
Black Seaman
Hardy Russian heirloom with rich, tangy tomato flavor, 4 to 8 oz fruits, plum-shaped with ribbed shoulders. Short, potato leaf plants. Determinate.
<i>75 days from transplanting</i>

Blondkopfchen Cherry
Big, leafy, indeterminate, regular-leaf tomato plants that yield a phenomenal amount of 1/2", grape-sized, brilliant yellow/gold, cherry tomatoes in clusters of 20-30. The vines are large and sprawling, so give them plenty of space. One of the BEST TASTING cherry tomatoes. Deliciously sweet with a slight citrusy tart finish. A non-cracking, disease resistant tomato variety that grows well in most climates including cooler growing regions.
<i>65 days from transplanting</i>
Bonner
Early, high yields of red, salad-sized fruit. Developed by Dr. Boe at the UI for Bonner County area. Source: Sandhill Preservation <i>55 - 70 days from transplanting</i>
Brandy Boy Hybrid
Huge pink Brandywine-type improved heirloom tomato with rich flavor with a rounder form, tidier growth habit, improved disease-resistance, and earlier, bigger yields. Source: Burpee <i>78 days from transplanting</i>
Brown Derby
Very unusual colored, dark orange and golden brown outside and inside – beautiful ochre coloring with a touch of dark green on the shoulders. Indeterminate, regular leaf plants, that produces medium to large (8-14 oz.) beefsteak-type tomatoes. Very meaty, dense flesh, sweet and mild flavor. Cross made from Aunt Ruby's German Green and Paul Robeson.
<i>80 days from transplanting</i>
Crimson Carmello
Bred in France for fresh eating, the round red juicy fruits have the perfect sweet to acid balance. Fruit is 4 to 5 inch across. Vigorous, disease resistant indeterminate plants. Renee's Garden seed. <i>70 days from transplanting</i>
Csikos Botermo
A rare Hungarian cluster tomato that has lovely yellow stripes on red skin. The orange-red fruits, which measure about 2.5 inches in size, are excellent in salads and for canning. Tart-sweet. Zones 3-8. Source: TomatoFest <i>65 days from transplanting</i>

Dogma's Perfection
Vigorous, abundant. Medium-sized, slightly flattened, pale-yellow fruits with delicate, light red striping. Deliciously flavorful, overtones of tropical fruit and subtle hints of lime. Firm, juicy, and jewel-like in appearance. Source: TomatoFest
<i>75 days from transplanting</i>
Dwarf Wild Fred
Small, dark brown fruit, often lobed or ribbed, with excellent flavor, moderately sweet and intense. An excellent product of the Dwarf Tomato Project resulting from a cross between Carbon X New Big Dwarf. Dwarf indeterminate. <i>75 days from transplanting</i>
Faribo Goldheart
This prolific orange tomato has 3-inch fruit with delicious nutty flavor. One of my new favorites! TomatoFest seed. <i>80 days from transplanting</i>
Galinas Yellow Cherry
This favorite yellow cherry has a tangy, citrus-y flavor. Loads of 1.5-inch fruit. TomatoFest seed. <i>75 days from transplanting</i>
Hybrid Early Doll
One of the earliest tomatoes, these bright red, 4 to 5 oz fruits have an outstanding tomato flavor. Seeds 'n Such seed. <i>55 days</i>
Jaune Flamme
Beautiful apricot orange tomato with 4-oz fruit with an excellent fruity flavor. Local seed saver. <i>70-80 days from transplanting</i>
Jennie
Polish heirloom tomato with large pink smooth beefsteak tomatoes with outstanding flavor. TomatoFest seed. <i>74 days from transplanting</i>
Kootenai
Extremely compact, early-ripening tomato developed by the Univ. of Idaho for cold mountain gardens. Bears loads of 2-inch plants on a small ornamental plant. Flavor not outstanding but plant is reliable and it's good for cooking. Source: Delectation of Tomatoes.

GUIDE TO TOMATO VARIETIES GROWN IN THE GROW! TEST GARDEN, 2022

<i>55-60 days from transplanting</i>
Marianna's Peace
An indeterminate, potato-leaf variety that produces large yields of 1-2 lb., pink, beefsteak tomatoes with exceptionally rich, luscious, complex flavors reminiscent of the finest of those "old-fashioned" tomato flavors. Source: TomatoFest
<i>85 days from transplanting</i>
Melissa Kavkazskaya Ovcharka
Big sweet red tomatoes from Russia with well-balanced flavor, up to 16 oz. Source: Delectation of Tomatoes.
<i>80 days from transplanting</i>
New Yorker
One of the earliest standard-size tomato. High yielding plant has 4 to 6 oz beefsteak-type fruit that will set fruit in cool, short-season conditions. Determinate. Resistant to blossom end rot. Totally Tomatoes seed.
<i>66 days from transplanting</i>
Nicholayev Yellow Cherry
Rare Russian cherry tomato. Semi-determinate, regular leaf plant produces huge amounts of 3/4-inch, bright-yellow, round to oval cherry tomatoes. Another Russian variety that produces fruit even in cooler growing regions. Disease resistant.
<i>70 days from transplanting</i>
Paul Robeson
Dark, dusky-red tomato has dark green shoulders and red flesh. Award-winning flavor is amazing, described as earth, exotic and well-balanced. Slightly flattened round fruit grows to 4 inches. Tomatofest seed.
<i>74 days from transplanting</i>
Red Pride
High yields on vigorous, compact plants. Has superb flavor, very reliable production of 10-oz fruit that is resistant to wilt. Determinate. From the Andes.
<i>78 days from transplanting</i>

Polish Giant Heart Variant
Indeterminate, regular wispy leaf plant produces abundant crops of 5-12 oz., medium to large, pink, heart-shaped, meaty, juicy, tomatoes with great complex flavors.
<i>80 days from transplanting</i>
San Marzano
Compact and prolific producer of bright-red, slim, 2-3 inch, plum-type, tomatoes over a long season. A paste tomato with a pointy end, heavy walls, a few seeds, and little juice, so it's great for a delicious tomato sauce. Crack-resistant.
<i>70 days from transplanting</i>
Shenghaung Cherry
This 5', indeterminate, regular leaf plant produces an abundance of beautiful red, round, 1-inch, cherries filled with sweet but slightly tart flavors. My favorite red cherry!
<i>75 days from transplanting</i>
Summer Girl Hybrid
Round 5-6 oz. fruit are a full 1.5 oz. bigger than Early Girl, with a yield 20% larger. Plants feature exceptional disease tolerance (verticillium and fusarium). DIDN'T PERFORM AS ADVERTISED FOR ME IN 2022. <i>50 days from transplanting</i>
Sungold Hybrid Cherry
Amazing sweet-tart flavor in this gold cherry tomato. Very productive, with an early developing rich flavor. Perfect for snacking in the garden!
<i>65 days from transplanting</i>
Sunset's Red Horizon
Native to Southern Russia. Huge, 4-6", meaty, heart-shaped, delicious tomatoes are proven resistant to cold and frost. Source: TomatoFest
<i>65 days from transplanting</i>

Super Sauce Hybrid
Weighing in at 2 lb., a whopping 5.5" tall x 5" wide, SuperSauce is very productive as well. Indeterminate, disease-free plants yield a summer-long supply of the exquisitely flavored marinara, tomato gravy or meat sauce plus plenty for salads and slicing. NOTE: HAD SOME BLOSSOM END ROT IN 2022 BUT IT GREW OUT OF IT.
<i>70 days from transplanting</i>
Super Sioux
From Nebraska. Perfect variety for hot and dry climates. Semi-determinate, regular leaf plant produces big sets of crack-free, thick-skinned, round, medium-sized (4-5 oz.), red fruit. Good complex, earthy flavors with sweetness balanced with a pronounced tartness. Good acid levels make it even a better variety for canning. Good wilt resistance. <i>70 days from transplanting</i>
Sweet Scarlet Dwarf
Determinate, dwarf, rugose, potato leaf plants produce a heavy yield of 6-16oz., oblate, smooth red tomatoes that offer exceptional, robust, complex flavors. Thought to be one of the best flavored of the new Dwarf varieties. <i>75 days from transplanting</i>
Thornburn's Terracotta
With honey-brown skin, orange-pink flesh, and green seed mass, this is an eye-catching slicer with an out-of-this-world flavor. The tomato produces heavily during mid-season and then drops off quickly once cool weather sets in. As a cooker it will yield a pumpkin-orange sauce with a floral aroma. Indeterminate, regular leaf plants. Introduced in 1893 by James Thornburn, New York.
<i>75 days from transplanting</i>
Zarnitza
Short indeterminate heirloom produces delicious 2.5 to 3 inch tomatoes. One of the best early varieties, excellent for cool season areas. TomatoFest seed
